

ABSTRACT OF THE DISCLOSURE

A fold down operator (10) is provided for a rotatable spindle (224) of casement window assembly (200). The operator (10) comprises a hub (12) and a handle (48). The hub (12) has a receiver (22) and an arm (32) extending from the receiver (22). The receiver (22) is adapted to connect to the spindle (224). The handle (48) has a cavity (112). The handle (48) is pivotally connected to the arm (32) such that the handle (48) is pivotable between a closed position wherein a portion of the receiver (22) is positioned within the cavity (112), and an open position, wherein the receiver (22) is outboard of the cavity (112).
